

# **Thermoproof Interior**

Thermoguard Thermoproof Interior Fluid is a clear, colourless, penetrating Fire Protection with an optional functional Thermoguard Thermoproof Interior Sealer for wear, damp & UV resistance available in clear or woodstain colours.

**How It Works** In a fire, Thermoproof Fluid reacts with the woods cells to create a flame & heat resistant barrier. Thermoguard Thermoproof Interior Sealer (optional) is a flame-retardant sealer.

## **Finish Options**

- Bare wood effect
- Clear sealed using Interior Sealer matt or satin
- Woodstain\* using Interior Sealer matt or satin

#### **UKAS Fire Test Standards**

BS EN Class B s2 dO

Class O

Note: This product does not achieve 30 or 60min fire resistance.

#### **Application**

• Bare wood option - 1 coat Thermoguard Thermoproof Interior Fluid

1 coat Thermoproof + 1 coat Thermoguard Thermoproof Interior Sealer Clear\*\* Woodstain Finish:

1 coat Thermoproof + 1 or 2 coats Thermoguard Thermoproof Interior Sealer Woodstain\*\*

- \*Resists light cleaning & handling.
- \*\*Allow Thermoproof to fully dry (min. 4 days) before applying any sealer.
- \*\*\*2nd coat for added UV protection, damp rooms or moderate cleaning.

NOTE: To check final effect, apply to test patch before application to entire area.

Certification A Certificate of Supply can be issued on request for projects for insurance, Fire

and Building Control Authority and Client Records.

**Application Methods** Brush, Roller, Spray

#### **Pack Sizes**

- Thermoproof Interior Fluid 20m², 80m²
- Clear + Woodstain Sealer 20m<sup>2</sup>, 80m<sup>2</sup>

### **Application Conditions**

<sup>\*</sup>For available colours see Thermoguard Thermoproof Interior Sealer, also colour match service available.

# **Thermoproof Interior**

Apply to dry wood (Max. 16% moisture), above 5°C in dry conditions.

#### Limitations - Stained, Varnished or Painted Wood

- For treatment with Thermoproof to be effective, it needs to be able to penetrate the wood.
- Thermoproof can be applied over water-based penetrating wood dyes that do not seal or make the wood water-proof.
- To fire protect painted wood, see <u>Thermoguard Timbercoat</u>.
- To fire protect clear normal varnished wood, use <u>Thermoguard Fire Varnish Basecoat</u> & <u>Thermoguard Fire Varnish Overcoat</u>.
- To fire protect external stained varnished, woodstained or other coated wood, contact Technical Dept.

#### **New Fire Regulations & Tests Explained**

- The new fire standard BS EN test lasts 20 minutes with airflow replaces the old BS 476 tests which lasted 10 minutes and strangely restricted airflow.
- The new standard for flamespread and heat release Class B replaces Class O.

The new BS EN tests also monitor -

- Smoke & Gas "s" s1 + s2 are none or very low & compliant levels, s3 = moderate, s4 = heavy smoke.
- Flaming Droplets or Airborne particulates dO is none, d1 = low, d2 = moderate, d3 = high levels.

## **Environment & User Friendly**

Thermoproof Interior Fluid, Thermoproof Interior Clear & Woodstain Sealers are water-based and environment friendly.

#### **Quality Assurance**

Products Manufactured under ISO 9000.

Cleaning Return as much unused material to its original container as possible. Wash brushes

rollers and guns with clean waters immediately following use.
